

Università degli studi Milano-Bicocca

Department of Statistics and Quantitative Methods

Seminar Series in Biostatistics

A not so short review on survival analysis in R

Alessio Crippa, PhD

Department of Medical Epidemiology and Biostatistics
Karolinska Institutet, Stockholm, Sweden

In this lecture Alessio will give an overview on how to implement several survival techniques using the R programming language within RStudio. He will show different models and tests, ranging from non-parametric, semi-parametric to parametric regression models.

Alessio received his PhD from Karolinska Institutet, Stockholm, working on the development of statistical methods for quantitative review and meta-analysis. He is currently working as senior research specialist at the same university focusing on the design of adaptive clinical trials and their analysis using Bayesian survival models.

The seminar will be also available on ZOOM:
MEETING ID: 651 0002 8770
PWD: 490973

Friday, 31 March 2023 | 12:15-1:15 pm

Laboratory 717, Building 7, Via Bicocca degli Arcimboldi 8, Milano
